

Project Management Program (Level 1)

Duration: 3 Months (12 Weeks)
Mode: Physical & Virtual

Summary

Learn to plan, organize, and manage real projects confidently using tools like Trello, Notion, and ClickUp — from idea to successful delivery.

Course Overview

The Cirvee Project Management Program (Level 1) is designed for individuals who want to master the art of getting things done — the smart, structured way. Over 12 weeks, you'll learn how to initiate, plan, execute, and close projects across industries using proven frameworks like PMBOK and Agile Scrum.

Through practical case studies and simulated projects, you'll explore how to define project goals, allocate resources, manage risks, and lead teams effectively. You'll also get hands-on experience with the top project management tools used globally — Trello, Asana, ClickUp, Notion, and Microsoft Project.

By the end of this course, you'll be equipped to coordinate real projects in startups, NGOs, and corporate settings. Whether you're managing a product launch, a design sprint, or a tech event, you'll know how to deliver results — on time and within budget.

Modules Overview

- 01. Introduction to Project Management**
Understand what makes a project successful and explore the project lifecycle

- 02. Project Initiation**
Learn to define project goals, identify stakeholders, and create a project charter.

- 03. Project Planning I – Scope & Deliverables**
Break down project scope and deliverables using SMART objectives and WBS.

- 04. Project Planning II – Schedule & Resources**
Create Gantt charts, estimate timelines, and allocate team resources effectively.

- 05. Project Planning III – Budget & Cost Management**
Develop realistic budgets and balance scope, time, and cost constraints

- 06. Risk & Quality Management**
Identify potential risks and create a risk register for proactive management.

- 07. Project Execution**
Manage teams, delegate tasks, and lead communication across stakeholders.

- 08. Monitoring & Control**
Track progress, generate status reports, and manage project changes smoothly.

- 09. Project Closure & Evaluation**
Document lessons learned and close out projects with success metrics.

- 10. Agile Project Management**
Adopt Agile and Scrum methodologies to manage flexible, fast-moving projects.

- 11. Tools Masterclass**
Master Trello, ClickUp, Asana, and Notion to manage projects digitally.

- 12. Capstone Project & Presentation**
Execute a real project — from planning to presentation — as your final assessment.
