

Project Management Program (Level 2 – Advanced)

Duration: 4 Months (16 Weeks)
Mode: Physical & Virtual

Summary

Master advanced project leadership, Agile management, and PMP-level skills to lead complex projects across tech, business, and NGO sectors.

Course Overview

The Cirvee Advanced Project Management Program is built for professionals ready to move from managing small tasks to leading large-scale projects. Over 16 weeks, you'll gain the leadership, analytical, and technical skills required to manage people, processes, and performance in dynamic environments.

You'll dive deep into global frameworks like PMBOK (7th Edition), Agile, and Scrum, learning how to balance structure and flexibility across different industries. From risk management and procurement to stakeholder communication and governance, this program is packed with real-world simulations and case studies.

You'll also explore enterprise-level tools such as Microsoft Project, Jira, Notion, and Monday.com, mastering the same technologies used by international project teams. By the end of this course, you'll be capable of managing multiple projects, leading teams effectively, and qualifying for certifications like PMP, CAPM, or Scrum Master.

Modules Overview

- 01. Project Leadership & Professional Ethics**
Understand leadership dynamics, ethical decision-making, and stakeholder influence.

- 02. Advanced Project Integration Management**
Manage complex projects and interdependencies using MS Project and ClickUp.

- 03. Stakeholder & Communication Strategy**
Build stakeholder maps and communication frameworks for executive reporting.

- 04. Scope & Change Management**
Handle scope creep and client-driven change requests through effective control systems.

- 05. Advanced Scheduling & Time Control**
Apply CPM and resource leveling techniques to build efficient timelines.

- 06. Cost & Procurement Management**
Use Earned Value Management (EVM) and procurement best practices to stay on budget.

- 07. Risk Management Mastery**
Perform quantitative analysis and create contingency plans with actionable audits.

- 08. Quality Management & Continuous Improvement**
Apply Six Sigma and QA methods for consistent project excellence.

- 09. Agile Project Management I (Scrum Foundations)**
Simulate real sprints and master Agile team structures using Trello or Jira.

- 10. Agile Project Management II (Hybrid & Scaling Agile)**
Blend Kanban and Scrum to manage larger, hybrid project structures.

- 11. Performance Monitoring & Reporting**
Build live dashboards and KPI reports using Notion or Google Data Studio.

- 12. Project Governance & Organizational Alignment**
Learn PMO structures and manage portfolios aligned with company goals.

13. Change & Conflict Management

Strengthen soft skills in negotiation, adaptability, and emotional intelligence.

14. Global Certifications & Professional Growth

Prepare for PMP, CAPM, and PRINCE2 certifications with guided mentorship.

15. Capstone Project Execution

Lead a real project for Cirvee or a partner brand from planning to execution.

16. Capstone Presentation & Reflection

Defend your project before an industry panel and present your leadership insights.

Career Opportunities

After this program, you can work as a:

Project Manager

Program Manager

Scrum Master

Product Lead

Project Coordinator
(Senior)
